

Our logo features the core of computers, which are the circuits behind, with our wonderful initialism ("BCS") in Goblin One font.

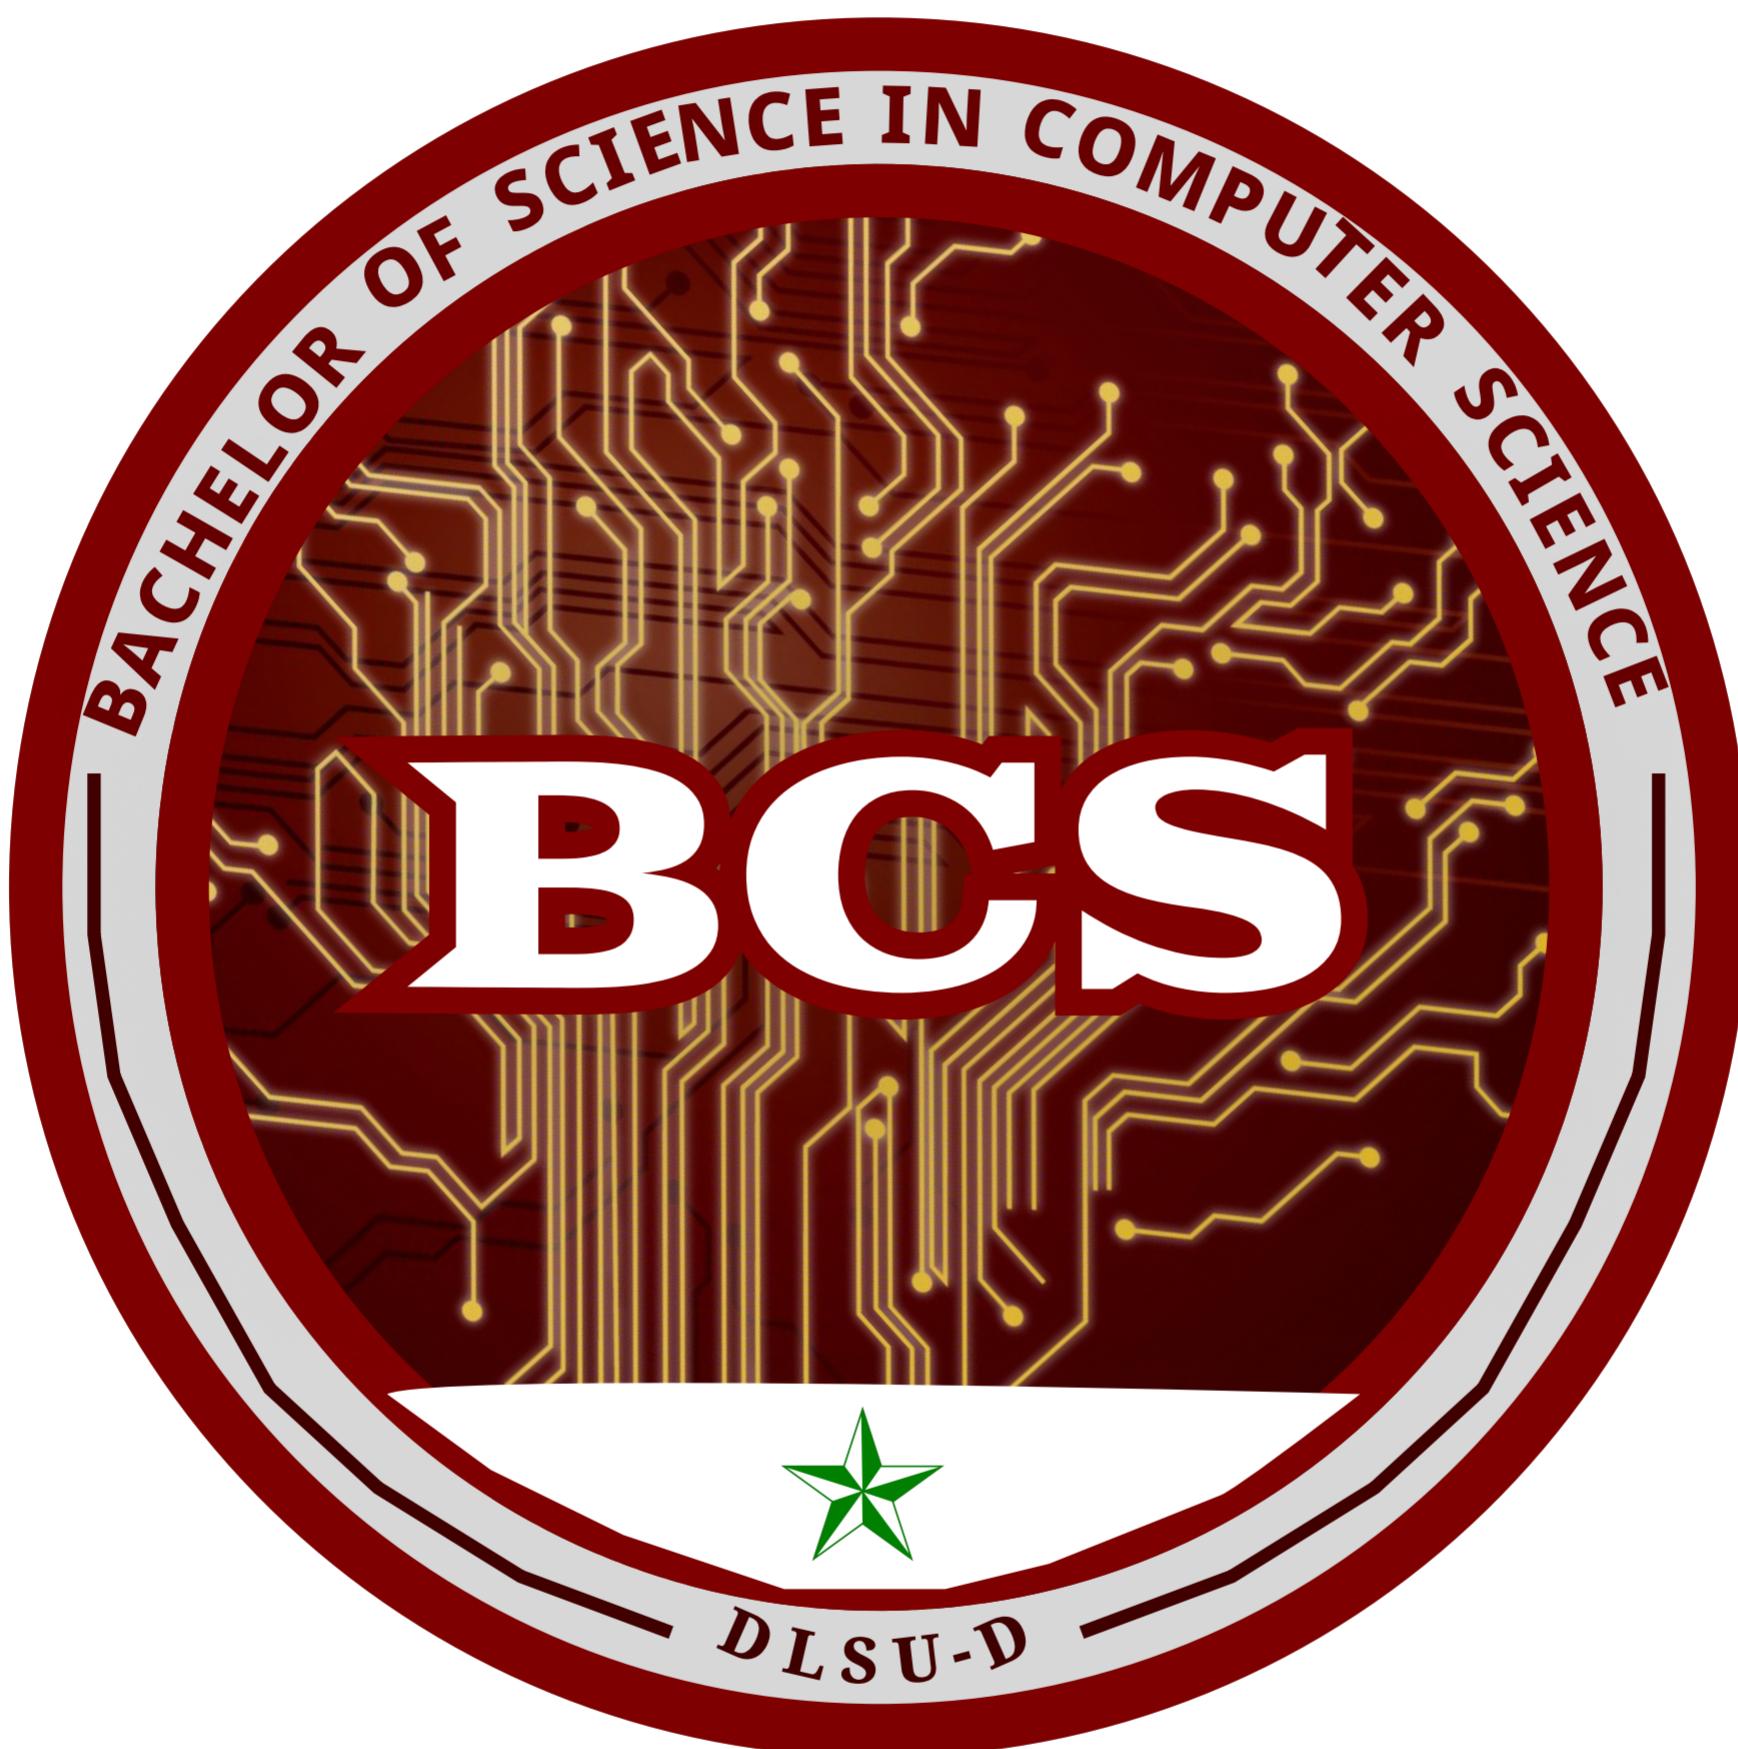

That is enclosed in a seal that features the full name of our program, and the university that offers it.

Bachelor of Science in Computer Science

A program under the CSCS (College of Science and Computer Studies)

The Bachelor of Science in Computer Science program prepares students to be highly competent and certified in the areas of computing theory and applications; trains them in the areas of abstract reasoning, analytical thinking and research; with track in: Robotics or Mobile and Game Development.

College of Science and Computer Studies

A college within De La Salle University – Dasmariñas

The College of Science and Computer Studies (CSCS) imparts quality education to its students by equipping them with multiple levels of skills and knowledge in the Biological and Physical Sciences, Mathematics, Computer Science and Information Technology through relevant applications and research-based activities.

College of Business Administration and Accountancy

College of Business Administration and Accountancy (CBAA) seeks to produce socially-aware and competent business professionals and entrepreneurs in the country, particularly in Southern Luzon by promoting adherence to high business moral standards and commitment to community development.

College of Criminal Justice Education

The College of Criminal Justice Education (CCJE) fosters high concepts of citizenry and leadership by instilling in its students an understanding of the Constitutional guarantees, due process of law, and respect for human rights.

College of Education

The College of Education (COEd), recognized as a Center of Excellence in Teacher Education by the Commission on Higher Education (CHED), offers a broad educational program that encompasses the development of educators both in the elementary and secondary levels of basic education. It aims to promote an educational system that will serve as a dynamic resource in the process of social transformation instrumental to progress.

College of Engineering, Architecture and Technology

A steady foundation in engineering and technology is integral to the purpose of nation building. As infrastructure and machinery continue to define the status of nations, formal education on the field becomes a key catalyst for progress.

College of Liberal Arts and Communication

The College of Liberal Arts and Communication (CLAC) seeks to become a center and a cradle of ideas and virtues that resonate the philosophy of St. John Baptist De La Salle. It is a college which is a community of no mere stakeholders but partners and associates who put charity and kindness over and above justice and rightness. CLAC shall be a college of the future, a college without borders, where innovation in education is a culture.

College of Tourism and Hospitality Management

A leading tourism and hospitality higher education institution, driven by excellence, innovation, sustainability, and Lasallian values. We deliver tourism and hospitality education that embodies quality, responsive, and value-laden programs in academics, research, and community extension.
